Reaching Out for Science
Moments from the Science and Engineering Festival, 7–8 March 2018 and the March for Science, 14 April 2018, Washington, D.C., USA

OSA partnered with the Osnabrück University to guide attendees through a Lego laser maze.

The OSA student chapter at the University of Virginia connected with students at its festival booth.
Sign-wielding participants, from OSA and elsewhere, carried the message of science support to the U.S. Capitol building.
