The effort to contain COVID-19 has many millions around the globe working and learning from home. Here we look at a few popular sites for virtually exploring our world through science.

### STEM Connection
Weekly online sessions and tutorials led by female role models in STEM fields
- [stemettes.org](https://stemettes.org)

### Science Fun
Learn biology, physics and chemistry through quick and easy experiments
- [funology.com](https://funology.com)

### Experience Optics
Optics demos and activities to help kids understand the physics of light
- [optics4kids.org](https://optics4kids.org)

### Local & Global Issues
Use science to raise awareness and address local and global issues
- [scistarter.org](https://scistarter.org)

### Wildlife Research
Learn about wildlife research needs through 78 live cam videos
- [explore.org](https://explore.org)

### Earth & Space Studies
Comb through data to assist NASA with scientific discoveries
- [science.nasa.gov/CitizenScience](https://science.nasa.gov/CitizenScience)

### Explore Science Virtually
- **Science & Technology**
  - Comb through data to assist NASA with scientific discoveries: [science.nasa.gov/CitizenScience](https://science.nasa.gov/CitizenScience)
- **STEM Connection**
